Profile

Senior software engineer with strong front-end ownership in regulated product environments. I build TypeScript and React interfaces, shared UI patterns, and business-critical workflows from architecture to production.

Experience

Software Developer | Financeclub

Oct 2023 - Dec 2025 | Paris, France | Hybrid/Remote

- Took technical ownership after team restructuring, leading architecture, delivery, and technical decisions for the platform.
- Designed and delivered HubWise, a CRM/ERP covering the mortgage-credit lifecycle from intake to notary signature.
- Defined a 20+ package Turborepo monorepo with PostgreSQL RLS and business-critical modules including reporting, document workflows, Microsoft Graph, and regulatory calculations.
- Worked in monorepo UI and design-tooling packages, including shared UI components and hooks, design tokens, and feature-flagged delivery flows.
- Maintained high quality on critical packages with test coverage above 90% and SonarQube A/A+ grades.
- Contributed to build-vs-buy, TCO, and product / UX hiring decisions in a regulated business context.

Software Developer | Staffmatch

Nov 2022 - Oct 2023 | Paris, France | Hybrid

- Built frontend features for a staffing platform spanning the main app, blog, and corporate site, with around 300,000 monthly marketing visitors.
- Shipped accessible, conversion-relevant interfaces with keyboard and touch navigation, dashboard widgets, FR/EN localization, and reusable UI patterns.
- Worked within and contributed to a shared uiLibrary and Storybook workflow, with Jest and Playwright-based visual regression infrastructure.
- Used Gatsby and GraphQL on the frontend for content and image queries across marketing and blog surfaces, in collaboration with design, backend, mobile, and QA.

Earlier Entrepreneurial Experience | Self-employed

Sep 2020 - Oct 2023

- Built and operated two Shopify businesses and a React / Node web app for digital audio product sales.
- Led end-to-end implementation, web performance improvements, and growth execution in production contexts.

Core Skills

- TypeScript, React, Next.js, Gatsby, Node.js, NestJS, PostgreSQL, Supabase
- Shared UI libraries, Storybook, Vitest / Jest / React Testing Library, Playwright, a11y, i18n
- GraphQL, multi-tenant architecture, regulated workflows, feature flags, CI/CD

Education

- Self-taught Full Stack Program (Udemy), Sep 2021 - Mar 2022
- KEDGE Business School, Management and Marketing, 2007 - 2012

Languages

- French: Native
- English: Full professional proficiency
